

Axiom Telecom Mobile Wallet

Axiom Telecom, the largest and primary authorised retailer of mobile phones and services in the Middle East, implemented mobile payment and money transfer service around the clock.

Challenge

Axiom was seeking a secure and comprehensive mobility platform to launch new and convenient mobile money services for the banked and unbanked users in the Middle East.

Solution

Axiom Mobile Wallet customers are provided with greater ease and convenience in accessing money transfer and payment services using any mobile device.

The Axiom Mobile Wallet powered by Vipera is an open and flexible stand-alone solution working via SMS, WAP and mobile application.

Every transaction is supported by secure infrastructure and industry standard protocols through payment gateways and bank direct debit interface (DDI). Using their mobile phones, users can transfer money nationally and internationally, link bank accounts or credit card accounts to their mobile phones, deposit money direct to the wallet and pay services.

Axiom Mobile Wallet users can pay for services like:

Local and Government services

Ticketing, cinema and theatre

Online service providers

Telecom services, e-vouchers and VAS

“Vipera has solid experience in providing mobile solutions for banking and payment facilities which will enable Axiom to commence immediate market activity providing necessary services to the financial field. These applications will enhance our customers’ quality of life by enabling them to use their mobiles as tools for everyday tasks”

Faisal Al Bannai
CEO, Axiom Telecom, Dubai
